SUMMARY

Frontend & Software Developer skilled in React JS, JavaScript, HTML, CSS, Python, Java, C++, and Swift with hands-on experience in responsive web applications, data structures, and problem solving. Developed frontend applications, CRUD systems, and iOS applications through real-world and personal projects.

WORK EXPERIENCE

Web Developer Intern – Arjava

Mar 2023 – Jun 2023 |

Apr 2024 – Dec 2024 |

Aug 2025 – Mar 2026

- Developed and maintained client websites including Seeds Foundation and Tap-Time platform
- Built responsive user interfaces using HTML, CSS, JavaScript, and React
- Integrated frontend with backend APIs for dynamic functionality
- Collaborated with team to deliver real-time project requirements

Frontend developer intern – Unwita

May 2025 – June 2025

- Worked on real-time project enhancements and UI improvements
- Improved website performance and user experience
- Implemented responsive design techniques

EDUCATION

Bachelor of Computer Applications (BCA)

Tagore College Of Arts And Science

2023 – 2026

ACADEMICS/PERSONAL PROJECTS

Seeds Foundation Website – <https://arjavatech.github.io/seeds-web/>

May 2023 – Jun 2023

- Built a complete client website as part of a development team
- Focused on responsive design and user accessibility

Chemistry Website – <https://nithyasriarjava.github.io/Sample/>

June 2024 – July 2024

- Developed an interactive chemistry learning web application with a responsive UI, improving user engagement and concept understanding
- Designed user-friendly UI for concept-based learning
- Technologies used: React, Javascript

AI-Powered Career Guidance Platform – <https://nithyasriarjava.github.io/carrer/>

24 May 2026 – 28 May 2026

- Developed a full stack AI-powered career guidance web application using React.js, FastAPI, Python, Supabase, and TiDB Cloud with personalized recommendations, roadmap generation, authentication, and AI career assistant integration. Deployed using GitHub Pages and Render.com.

Personal Projects

- Developed applications including task manager, notes app, Ticket booking app, and simple games
- Implemented CRUD operations and interactive UI

KEY SKILLS

React JS – Developed Stack, Login & Signup, Todo, Quiz, and Guess Game applications

HTML, CSS, Bootstrap – Built responsive pages for Hope 3 Foundation, Success Stories, Career Guidance, Donate, and Seeds Foundation

Python – Solved 70+ problems, developed Hangman Game, and practiced logical programming

Java – Implemented Linked List, Stack, Queue, and Tree

C++ – Worked on BFS Traversal, Binary Tree, and AVL Tree operations

Data Structures – Practiced fundamentals using Java and C++

Swift – Developed iOS apps including Ticket Booking, Rock Paper Scissors, and Todo applications

Tools – Git, GitHub, VS Code, API Integration

ACHIEVEMENTS

- Won 1st Prize in Debugging Competition
- Secured 2nd Prize in Web Design (MCC College)
- Secured 2nd Prize in No-Look Web Development (AM Jain College)
